

# How to embed a YouTube video in PowerPoint

1. Locate the unique serial number for the video. This can be found in the original URL. For example, if this is the original YouTube URL:

[http://www.youtube.com/watch?v=NrLmw\\_imNWM](http://www.youtube.com/watch?v=NrLmw_imNWM)

Then the serial number is: **NrLmw\_imNWM**

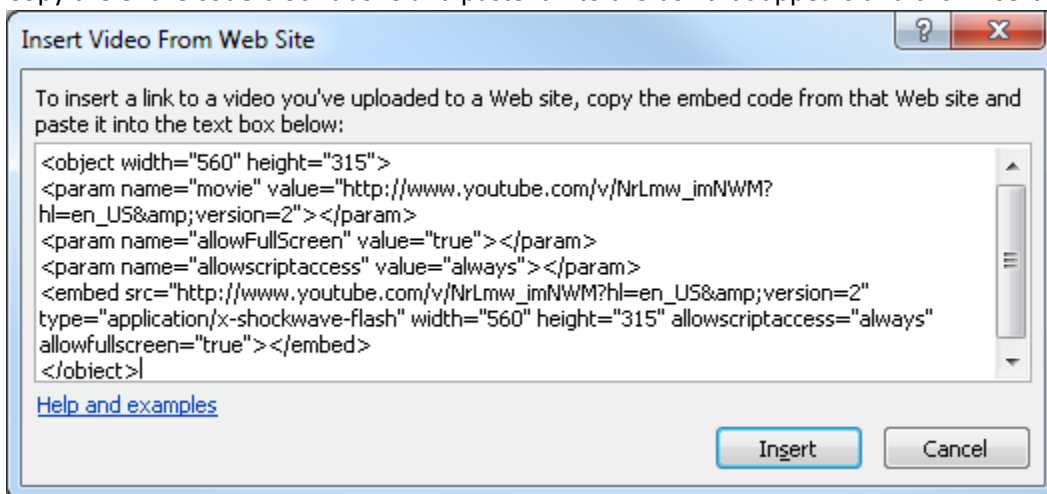

2. Highlight and copy the serial number from the URL and paste it into the two places in the code below (do this in Notepad):

```
<object width="560" height="315">
<param name="movie" value="http://www.youtube.com/v/NrLmw_imNWM?hl=en_US&amp;version=2"></param>
<param name="allowFullScreen" value="true"></param>
<param name="allowscriptaccess" value="always"></param>
<embed src="http://www.youtube.com/v/NrLmw_imNWM?hl=en_US&amp;version=2" type="application/x-shockwave-flash"
width="560" height="315" allowscriptaccess="always" allowfullscreen="true"></embed>
</object>
```

3. In PowerPoint, go to Insert → Video → Video from Web Site...

4. Copy the entire code block above and paste it into the box that appears and click Insert:

5. The video should now appear in the PowerPoint slide. You can resize the video within the slide as needed.
