

# TRC Stacks Organization Overview

**The TRC is organized** in the following ways. “**Stack**” is the term we use for a shelving unit. All stacks are marked on the end with the “**Section(s)**” found in the stack. “**Section**” is the highest level of organization in the TRC. Within each “**Section**” are “**Subject Areas.**” Within some “**Subject Areas**” are “**Sub-Categories.**” Below is a list of Sections, Subject Areas, and Sub-Categories.

**All Sections** (e.g. math, science, etc.) are organized by:

## 1. Publisher

Then grouped by **Grade Level** – elementary, middle school, high school

Within each **Grade Level** materials are organized by **Grade** (K, 1, 2, etc.)

**Children's Literature and Young Adult** are on the shelf by **subject matter** (e.g. non-fiction, fiction, multi-cultural, etc.), and these subject matters are not in alphabetical order. Within each subject matter, there may be **sub-categories** (e.g. biography, math, science, nature). Some of these **sub-categories** may be on the shelf in **alphabetical order by author**. These will be grouped by the **first letter of the author's last name**. These small groups may not be in alphabetical order, but may be ordered by book height, or in some cases random order.
